Make	Audi	Fuel	Gasoline
Model	A3	Drive	Not in the decode
Trim	Progressiv	Maker	AUDI AG
Body	Wagon	Plant	Ingolstadt, Germany

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/audi/a3/2013

3 recalls listed by Transport Canada for this model year

Label

2020353 4 Aug 2020

Issue: On certain vehicles, the warning label for the engine block heater cable is written in English only. As a result, a French user may not receive important safety information about how to use the engine block heater. A label that is not provided in both official languages could create confusion. Safety Risk: User confusion could increase the risk of injury when trying to use the block heater. Corrective Actions: The company will mail each owner a new label for the block heater cable. If you would like help installing the label, you can contact a dealer for assistance.

Airbag

2018059 30 Jan 2018

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the driver frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the driver frontal airbag inflator. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace airbag inflators before their function would be affected. Additional Note: For the Audi A4, S4, A5 and S5 models, this campaign only affects the Cabriolet versions of these models. Also to Note: This recall supersedes the Audi brand vehicles subject to recall 2016-064 (Audi Recall 69N1) and 2016-065 (69N2). Audi brand vehicles completed under the previous 2016-064 and 2016-065 recalls require repair under this recall, as the previous recall remedy was an interim repair. Interim repair parts must be replaced with final repair parts.

Airbag

2016065 9 Feb 2016

On certain vehicles, the driver frontal airbag inflator could produce excessive internal pressure during airbag deployment. Increased pressure may cause the inflator to rupture, which could allow fragments to be propelled toward vehicle occupants, increasing the risk of injury. This could also damage the airbag module, which could prevent proper deployment. Failure of the airbag to fully deploy during a crash (where deployment is warranted) could increase the risk of personal injury to the seat occupant. Correction: Dealers will replace the front driver airbag inflator. Note: This only affects the Cabriolet versions of the Audi A4 and S4 models.

Window sticker	We do not collect window stickers for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 4 live listings, as of 28 Oct 2026
[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
