§2 OBLIGATIONS [2]

cardog.app/tools/recalls/bmw/ix/2024

4 recalls listed by Transport Canada for this model year

High voltage

2025381 16 Jul 2025

Issue: On a small number of vehicles, the high-voltage battery may not have been manufactured properly. As a result, the high-voltage battery cell modules could fail and cause the high-voltage system to shut down. If this happens, there could be a loss of power to the wheels and/or the high-voltage battery could overheat. Safety Risk: A loss of power to the wheels could increase the risk of a crash. A battery that overheats can create a fire risk, even while the vehicle is parked and turned off. Corrective Actions: BMW will notify owners by mail and advise you to take your vehicle to a dealership to replace the affected high-voltage battery cell modules.

High voltage

2025320 13 Jun 2025

Issue: On certain vehicles, a problem with the electric drive motor software could cause the vehicle to enter a fail-safe mode. If this happens, there could be a loss of power to the wheels. Note: This problem would cause a warning light to turn on and a warning message to be displayed. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: BMW will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the electric drive motor software. Alternatively, you may schedule an appointment to have the update performed at a BMW dealership.

Label

2024544 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Accessories

2023333 7 Jun 2023

Issue: On certain vehicles, the driver's hand could accidently reactivate the cruise control while turning at low speeds. If this happens, the vehicle could accelerate and cause an unexpected speed increase. Safety Risk: An unexpected increase in vehicle speed could create the risk of a crash. Corrective Actions: BMW will notify owners by mail and instruct you to take your vehicle to a dealership to update the vehicle software.

> Listed for the model year, not checked against your VIN. BMW confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 18 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
