| Make | Mercedes-Benz | Fuel | Gasoline |
| Model | E-Class | Drive | Not in the decode |
| Trim | E350 | Maker | Mercedes-Benz Cars |
| Body | Convertible | Plant | Germany |

## §2 OBLIGATIONS [2]

cardog.app/tools/recalls/mercedes-benz/e-class/2011

**7** recalls listed by Transport Canada for this model year

### Airbag — 2021514 — 16 Aug 2021

Issue: On certain vehicles, an incorrect passenger-front airbag may have been installed during a previous repair. As a result, the airbag may not inflate properly in a crash. Safety Risk: An airbag that does not inflate properly can increase the risk of injury in a crash. Corrective Action: Mercedes-Benz will notify owners by mail and instruct you to bring your vehicle to a dealer to replace the passenger-front airbag.

### Airbag — 2018741 — 28 Dec 2018

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the passenger frontal airbag module. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace airbag inflators before their function would be affected.

### Steering — 2018724 — 20 Dec 2018

On certain vehicles originally sold or currently registered in areas of heavy road salt usage during winter months (Quebec, New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland & Labrador), the bolts that attach the electric power steering assist motor to the steering gear housing may corrode and break. This could cause a loss of power steering assist. The resulting increase in steering effort could create the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the mounting bolts and apply a corrosion protection coating to the gear housing and bolts. If the bolts bolt cannot be removed, a replacement steering gear will be installed.

### Airbag

2016158 13 Apr 2016

On certain vehicles, the driver frontal airbag inflator could produce excessive internal pressure during airbag deployment. Increased pressure may cause the inflator to rupture, which could allow fragments to be propelled toward vehicle occupants, increasing the risk of injury. This could also damage the airbag module, which could prevent proper deployment. Failure of the airbag to fully deploy during a crash (where deployment is warranted) could increase the risk of personal injury to the seat occupant. Correction: Dealers will replace the front driver air bag module.

### Fuel system

2011359 4 Oct 2011

On certain vehicles equipped with a diesel engine, the fuel filter assembly may develop a leak from the fuel heater o-ring seal. Diesel fuel spilt on the roadway could endanger other road users by making the roadway unexpectedly slippery. This could ultimately result in a vehicle crash causing property damage and/or personal injury. Correction: Dealers will inspect and, if necessary, replace the diesel fuel filter assembly.

### Visual system

2010432 3 Dec 2010

Certain vehicles were manufactured with rear window privacy glass that fail to conform to the Canada Motor Vehicle Safety Standard 205 - Glazing Materials. Correction: Dealers will replace the affected windows.

### SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] Cardog market quote, same model year, 8 live listings, as of 29 Oct 2026
[4] Live public dealer listings on Cardog, as of 29 Oct 2026

### STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
