**2** recalls listed by Transport Canada for this model year

### Visual system

2025716 19 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to update the driver assistance system control unit software.

### Accessories

2023662 13 Dec 2023

Issue: Under certain conditions, the 220 V vehicle charging cable plug could become damaged by the house power outlet. As a result, the charging cable could overheat while charging. Note: This recall only affects electric and plug-in hybrid electric (PHEV) models. Safety Risk: A charging cable that overheats could create a fire risk. Corrective Actions: Porsche will notify owners by mail and advise you to take your 220 V vehicle charger to a dealership to replace the vehicle charging cable.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
