Issue: Under certain conditions, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Canadian regulations require the rearview image to display when the vehicle is reversing. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Lamborghini will notify the owner by mail and advise them to take their vehicle to a dealership to update the rearview camera software.

Issue: On a small number of vehicles, the pins securing the gas struts for the doors may not have been tightened properly. As a result, the pin(s) could loosen and detach. If this happens when a door is in the open position, the door could fall and close suddenly. Additionally, this problem could also make it difficult to open the door from inside the vehicle. Safety Risk: A door that falls suddenly could increase the risk of injury. Additionally, a door that is difficult to open could slow your exit from the vehicle in an emergency. This could also increase the risk of injury. Corrective Actions: Lamborghini will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, tighten the pins for the doors gas struts .

Issue: On certain vehicles, the connecting rod between the windshield wiper motor and the passenger-side windshield wiper arm could bend and separate. If this happens, the windshield wiper may not work. Safety Risk: Windshield wipers that don't work could reduce visibility and increase the risk of a crash. Corrective Actions: Lamborghini will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the passenger-side wiper connecting rod.
