2 recalls listed by Transport Canada for this model year

Accessories

2017276 23 May 2017

Certain decorative chrome door handle covers, sold as aftermarket accessories through Ford dealers, may affect compliance to Canada Motor Vehicle Safety Standard (CMVSS) 206 – Door Lock and Door Retention Components. These accessories may cause the door handles to fail to conform to the inertial load requirements of the standard. A door handle fitted with a chrome cover could unlatch due to inertial loads during a side impact crash if the door were unlocked, which would increase the risk of injury. Correction: Covers will be removed from vehicles and owners will be reimbursed for parts and labour.

Powertrain

2017190 3 Apr 2017

Certain vehicles equipped with 6.2L gasoline engines and 6R100 transmissions may fail to conform to Canada Motor Vehicle Safety Standard (CMVSS) 102 – Transmission Control Functions and CMVSS 114 – Theft Protection and Rollaway Prevention. The park rod actuating plate may have been damaged during manufacturing, which could inhibit transmission parking pawl engagement. If the operator were to move the shift lever to park, the transmission may not achieve mechanical park, which if the parking brake is not applied, could result in unintended vehicle movement, increasing the risk of injury and/or property damage. Correction: Dealers will inspect the park rod actuating plate and replace as necessary. Note: In the interim, owners are advised to use the parking brake whenever the transmission shift lever is in the Park position until the vehicle is repaired.
