§2 OBLIGATIONS [2]

cardog.app/tools/recalls/ford/ranger/2023

4 recalls listed by Transport Canada for this model year

Electrical 2026005 9 Jan 2026

Issue: On certain vehicles, the engine block heater could leak coolant. If this happens, the block heater could short circuit when it's plugged in.

Note: This recall replaces Transport Canada recall no. 2025-554. Vehicles that were repaired under that recall don't require this repair. Safety Risk: A short circuit can create the risk of a fire. Corrective Actions: To reduce the safety risk, Ford advises you not to use the engine block heater until the recall repairs have been completed. Ford will notify owners by mail and advise you to take your vehicle to a dealership to replace the block heater. Alternatively, owners can choose to have the dealership permanently disable the engine block heater.

Electrical 2025554 10 Oct 2025

This recall was replaced by Transport Canada recall no. 2026-005. Issue: On certain vehicles, the engine block heater could leak coolant. If this happens, the block heater could short circuit when it's plugged in. Safety Risk: A short circuit can create the risk of a fire. Corrective Actions: To reduce the safety risk, Ford advises you not to use the engine block heater until the recall repairs have been completed. Ford will notify owners by mail and advise you to take your vehicle to a dealership to replace the block heater.

Visual system 2025360 27 Jun 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Canadian regulations require the rearview image to display when the vehicle is reversing. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the SYNC software.

Wheels

2023243 21 Apr 2023

Issue: On certain vehicles, the wheel lug nuts may not have been properly tightened on the left-side of the vehicle. As a result, the lug nuts could loosen or fall off. If this happens, a wheel could separate from the vehicle. Safety Risk: A wheel separation could cause a loss of control and increase the risk of a crash. A wheel that separates could also hit another person or vehicle. Corrective Actions: Ford advises not to drive your vehicle until the wheel lug nuts have been inspected and tightened properly. Ford will notify owners by mail and advise you to contact a local dealer to arrange for this inspection. The dealer will replace any damaged lug nuts, wheel studs and wheels, as necessary.

Listed for the model year, not checked against your VIN. Ford confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
