Trim	Lariat	Maker	FORD MOTOR COMPANY
Body	Pickup	Plant	Wayne, Michigan, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/ford/ranger/2025

10 recalls listed by Transport Canada for this model year

Engine	2026258	27 May 2026
Issue: On certain vehicles, the engine may not have been manufactured properly. As a result, the engine could fail and cause a loss of power to the wheels. Note: This recall only affects certain vehicles equipped with a 2.3 L engine. Safety Risk: A sudden loss of power to the wheels could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to replace the engine.		
Seats and restraints	2026211	28 Apr 2026
Issue: On certain vehicles, the pivot bolts in the height adjuster assembly for the front seats may not have been manufactured properly. As a result, the bolt(s) could loosen and detach. If this happens, the seat(s) could move in a crash. Safety Risk: A seat that moves in a crash could increase the risk of injury. Corrective Action: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the height-adjust link(s) and pivot bolts.		
Electrical	2026190	15 Apr 2026
Issue: On certain vehicles, the wiring for the sun visors may not have been manufactured and/or installed properly. As a result, the wiring could become damaged and cause a short circuit or electrical arcing (sparks). Safety Risk: A short circuit or electrical arcing can create the risk of a fire or injury. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the sun visor wiring harness. The dealer will also update the body control module software.		

Engine

2026094 3 Mar 2026

Issue: On certain vehicles, the exhaust gas recirculation (EGR) valve may not have been manufactured properly. As a result, the EGR valve could fail and cause a loss of power to the wheels. Note: This recall only affects certain vehicles equipped with a 1.5 L engine, 2.0 L gas or hybrid engine or 2.3 L engine. Safety Risk: A sudden loss of power to the wheels could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail. The corrective actions for this recall are under development.

Lights and instruments

2026079 20 Feb 2026

Issue: On certain vehicles, a software problem with the integrated trailer module (ITRM) may cause the trailer lights not to work when towing. This problem could also cause the trailer brakes not to work on certain vehicles. Note: This problem would cause a "Trailer brake module fault" message to be displayed and turn signal telltale to flash rapidly. This recall also affects certain Super Duty incomplete vehicles. Safety Risk: Trailer lights that don't work could make the vehicle less visible and cause following drivers not to recognize that the vehicle is braking or intends to turn or change lanes. These issues could increase the risk of a crash. Additionally, a loss of trailer brakes could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the ITRM software. Alternatively, you may schedule an appointment to have the update performed at a Ford dealership.

Brakes

2025663 1 Dec 2025

Issue: On certain vehicles, the electronic brake booster (EBB) may not have been manufactured properly. As a result, the EBB could enter a failsafe mode and cause a sudden increase in brake pedal force. This could also cause certain advanced driver assistance systems not to work properly. Safety Risk: A sudden increase in brake pedal force can cause extended stopping distances and increase the risk of a crash. Additionally, driver assistance systems that don't work properly could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to replace the EBB.

|---|---|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 47 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | [6] Window sticker, issued by FORD, collected 14 Sep 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
