5 recalls listed by Transport Canada for this model year

Airbag

2021077 19 Feb 2021

Issue: This recall is for certain vehicles that had the driver-front and/or passenger-front airbag inflator replaced after a collision or theft. An obsolete airbag may have been installed. On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, may eventually degrade the propellant contained in the driver-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures, fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly, preventing its proper function. Safety Risk: If the vehicle is involved in a crash requiring an airbag deployment, the airbag inflator could rupture and create a risk of injury. Corrective Action: The company will notify owners by mail and instruct you to take your vehicle to a Ford dealer to inspect the driver and/or passenger airbag inflator or module and replace it, if necessary. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.

Airbag

2021029 27 Jan 2021

Issue: On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, may eventually degrade the propellant contained in the driver-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures, fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly, preventing its proper function. Safety Risk: If the vehicle is involved in a crash requiring an airbag deployment, the airbag inflator could rupture and create a risk of injury. Corrective Action: Ford will notify owners by mail. The corrective actions for this recall are under development. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.

Airbag

2019005 8 Jan 2019

Issue: On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, may eventually degrade the propellant contained in the passenger-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures, fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly, preventing its proper function. Safety Risk: If the vehicle is involved in a crash requiring an airbag deployment, the airbag inflator could rupture and create a risk of injury. Corrective Actions: Owners will be notified by mail and instructed to take their vehicle to a dealer to have the passenger-front airbag inflator replaced. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected. Additional note: This recall supersedes recalls 2016-347 (Ford Safety Improvement Program 16S26), 2017-024 (Ford Recall 17S01) and 2018-035 (Ford Recall 18S01). Vehicles repaired under the previous recalls do not require repair under this recall.

Airbag

2016347 6 Jul 2016

Ford Canada is conducting a voluntary Safety Improvement Program involving passenger airbag inflators in certain vehicles that were originally sold or ever registered in certain high humidity areas of the United States equipped with Takata airbags. Ford will replace the driver or passenger inflator on affected vehicles, depending on the vehicle involved. Owners who believe their vehicles may have been originally purchased or registered in the states of New Jersey, Delaware, District of Columbia, Maryland, Pennsylvania, Ohio, Indiana, Illinois, Virginia, West Virginia, Kentucky, Missouri, Nebraska, Kansas, Oklahoma, Arkansas, Tennessee, North Carolina, Nevada, Arizona, New Mexico, California, Texas, Louisiana, Mississippi, Alabama, Georgia, South Carolina, Florida, Hawaii, Puerto Rico or the U.S. Virgin Islands should contact a Ford dealer. This action is not being conducted under the requirements of the Motor Vehicle Safety Act. Note: This Safety Improvement Program is superseded by recall 2019005 (Ford Recall 19S01). Please see recall 2019005 for more information.

Lights and instruments

2011251 14 Jul 2011

On certain 2011 Ranger vehicles, the multi-function switch, installed during vehicle assembly, could malfunction and fail. Additionally, other vehicle models may have received the affected switch as a replacement part during service, and are therefore also involved in this campaign. Failure of the multi-function switch could result in a loss of turn signal, tail lamp, hazard warning signal flasher and/or stop lamp function. Failure of these lighting components to illuminate may result in the following road users being unaware of the driver's intentions, as well as reducing vehicle conspicuity during hours of darkness, which could increase the risk of a crash causing property damage and/or personal injury. Correction: Dealers will inspect and, if necessary, replace the multi-function switch.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 12 live listings, as of 27 Nov 2026

[5] Live public dealer listings on Cardog, as of 27 Nov 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
