§1 IDENTITY [1]

Model year	2011	Engine	3.7 L, 6 cylinders
Make	Ford	Fuel	Gasoline
Model	F-150	Drive	4x2
Trim	Not in the decode	Maker	FORD MOTOR COMPANY
Body	Pickup	Plant	Kansas City, Missouri, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/ford/f-150/2011

6 recalls listed by Transport Canada for this model year

Powertrain

2019065 12 Feb 2019

Issue: On some trucks, a sensor problem may cause the transmission to suddenly downshift to first gear. This could cause the rear wheels to suddenly slow and potentially create a loss of stability. Safety Risk: A loss of vehicle stability could cause a loss of control and increase the risk of a crash. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to have the Powertrain Control Module reprogrammed.

Brakes

2017246 8 May 2017

On certain vehicles equipped with 3.5L V6 GTDI EcoBoost engines, the electric vacuum pump (EVP) may fail due to moisture entry through the engine vacuum harness. Failure of the EVP may result in reduced brake assist immediately after first start up, and depending on the driver's reaction, may result in extended stopping distance which may increase the potential for a low-speed collision causing injury and/or damage to property. Correction: Dealers will replace the EVP and vacuum harness.

Powertrain

2016183 26 Apr 2016

Certain vehicles equipped with a 6-speed automatic transmission may experience an intermittent loss of the Transmission Output-shaft Speed Sensor (OSS) signal to the Power Control Module. This could potentially cause an unintended downshift into first gear, which depending on vehicle speed at the time of the downshift, may cause the rear tires to slide or lock up until the vehicle slows. This may result in a loss of vehicle control without warning, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will reprogram the Powertrain Control Module with updated software.

Powertrain

2012149 1 May 2012

Certain vehicles may have been equipped with an incorrectly manufactured Transmission Range Sensor. In some instances, when the shift lever is placed in the "R" position, signal may not be provided to the electronic transmission range indicator "PRNDL" for "R" illumination and/or for backup lamp activation. Should the backup lamps fail to illuminate, the driver's intentions to reverse may not be conveyed clearly to other motorists and/or pedestrians, which could result in property damage and/or personal injury. Correction: Dealers will inspect and, if necessary, replace the Transmission Range Sensor.

Powertrain

2011426 7 Dec 2011

Certain vehicles fail to comply with the requirements of Canada Motor Vehicle Safety Standard 102 – Transmission Control Functions. The Brake Transmission Shift Interlock (BTSI) switch may have been incorrectly manufactured and could fail. This would allow the transmission gear shift lever to be moved out of the PARK position without depressing the brake pedal. Depending which gear the driver selects, the vehicle could begin to move forward or backward immediately. This movement could result in property damage, or cause the vehicle to strike a bystander, potentially resulting in personal injury. Correction: Dealers will inspect and, if necessary, replace the BTSI switch.

Electrical

2010463 23 Dec 2010

On certain vehicles, the Body Control Module (BCM) may develop an internal short. If an electrical short occurs, an overheating condition may result in a vehicle fire causing property damage and/or personal injury. Correction: Dealers will inspect and, if necessary, replace the Body Control Module.

Listed for the model year, not checked against your VIN. Ford confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
