§1 IDENTITY [1]

Model year	2011	Engine	1.8 L, 4 cylinders
Make	Chevrolet	Fuel	Gasoline
Model	Cruze	Drive	Not in the decode
Trim	LS	Maker	GENERAL MOTORS LLC
Body	Sedan	Plant	Lordstown, Ohio, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/chevrolet/cruze/2011

7 recalls listed by Transport Canada for this model year

Accessories 2014274 3 Jul 2014

On certain vehicles, insulation on the engine block heater power cord may become damaged if the cord is handled during very cold days (temperatures below -25C). This could create an electrical shock hazard, which could result in personal injury. Correction: Dealers will replace the block heater cord.

Brakes 2013282 15 Aug 2013

On certain vehicles equipped with a 1.4L DOHC gasoline turbo engine and a 6T40 automatic transmission, the electric vacuum pump (which provides supplemental vacuum under certain operating conditions) may not function as designed. This could result in an intermittent reduction or loss of brake power assist, requiring greater brake pedal effort to slow or stop the vehicle. This could increase stopping distances, which may result in a crash causing property damage and/or personal injury. Correction: Dealers will replace a microswitch in the power brake vacuum pipe assembly.

Structure 2012188 22 Jun 2012

On certain vehicles, welds may have been omitted from the fuel tank mounting brackets during the vehicle manufacturing process. This could allow fuel leakage to occur as a result of a severe side impact crash. Fuel leakage, in the presence of an ignition source, could result in a fire causing property damage and/or personal injury. Correction: Dealers will inspect and, if necessary, secure the fuel tank brackets using fasteners.

Other

2012187 22 Jun 2012

On certain vehicles, oil spilt as a result of improper engine oil change procedures could contact hot engine or exhaust components, as well as the engine shield, which could cause the shield to ignite and burn. In addition, on vehicles equipped with a manual transmission, continuing to drive with a completely worn clutch may cause hydraulic fluid to be expelled from the clutch housing vent hole. In some instances, the fluid could be burning as it exits the vent hole. If the burning fluid contacts the engine shield, this too could cause the shield to ignite and burn. These issues could cause an engine compartment fire which could result in property damage and/or personal injury. Correction: Dealers will modify the engine shield to prevent fluid from contacting the shield.

Steering

2011187 5 May 2011

On certain vehicles, the bolt attaching the intermediate steering shaft to the steering gear input shaft may not have been properly installed during vehicle assembly. This could allow the joint to separate, which would result in the loss of steering function. A loss of steering control could result in a crash causing property damage and/or personal injury. Correction: Dealers will inspect and, if required, repair the intermediate shaft/steering gear assembly to ensure the bolt is fully seated and the shaft is properly assembled.

Other

2011186 5 May 2011

On certain vehicles, the automatic transmission shift linkage may not have been installed correctly during vehicle assembly. As such, the shift lever indicator may not accurately reflect the actual transmission gear selection. This could allow the driver to move the shifter to PARK and remove the ignition key, even if the transmission gear is not in the PARK position. Should the vehicle roll away, whether attended or not, it could strike another vehicle, stationary object, or a bystander, causing property damage and/or personal injury. Correction: Dealers will inspect and, if necessary, adjust the transmission shift linkage.

§5 DOCUMENTS

Window sticker This VIN reads as model year 1981 or 2011, before our coverage for this manufacturer.

SOURCES

- | | |
|---|---|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 15 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
