Trim	Premium	Maker	GENERAL MOTORS LLC
Body	Hatchback	Plant	Detroit Hamtramck, Michigan, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/chevrolet/volt/2012

3 recalls listed by Transport Canada for this model year

Engine 2015104 12 Mar 2015

On certain vehicles, if a driver exits the vehicle and were to inadvertently leave the vehicle "ON", after a period of time the vehicle's battery would drain and the vehicle's gasoline engine would begin to run. If the gasoline engine were to run for long periods of time when the vehicle is parked in an enclosed area, such as a garage, there is a risk of carbon monoxide build-up, which could result in asphyxiation or carbon monoxide poisoning. Correction: Dealers will update vehicle software to limit the time that an idle vehicle can be left in the "ON" position.

Accessories 2013460 20 Dec 2013

On certain vehicles, material used in the construction of the windshield sunshade, sold as an optional accessory, may not meet the requirements of the Canada Motor Vehicle Safety Standards (CMVSS) 302 - Flammability of Interior Materials. The sunshade's inner core material could burn faster than allowable by the standard. Note: The exterior material, exposed in normal use, meets the requirements of the standard. Correction: A production change was made to add a flame resistant coating to the interior corrugated plastic layer to remedy this non-compliance condition. No corrective recall action is required as the technical non-compliance condition is deemed to be non-safety related.

Lights and instruments 2011412 23 Nov 2011

Certain vehicles fail to conform to Canada Motor Vehicle Safety Standard (CMVSS) 108 - Lighting System and Retroreflective Devices, as well as CMVSS 114 - Theft Protection and Rollaway Prevention. These vehicles were inadvertently programmed with incorrect Daytime Running Lamp (DRL) and theft protection calibration files during vehicle assembly. This could allow the driver to switch off the DRL system while the vehicle is underway. It could also allow non-dealership personnel to reprogram a replacement ignition key. A loss of DRL illumination could render the vehicle less visible to other motorists and to pedestrians during daylight hours, possibly resulting in a crash causing property damage and/or personal injury. Correction: Dealers will reprogram the Body Control Module.

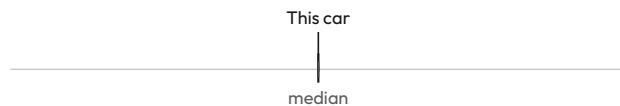

Listed for the model year, not checked against your VIN. Chevrolet confirms which apply.

Window sticker This VIN reads as model year 1982 or 2012, before our coverage for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN	[4] Cardog market quote, same model year, 1 live listings, as of 28 Oct 2026
[2] Transport Canada recall database, listed for the model year	[5] Live public dealer listings on Cardog, as of 28 Oct 2026
[3] NHTSA recall records (United States), listed for the model year	

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
