2 recalls listed by Transport Canada for this model year

Lights and instruments

2026165 2 Apr 2026

Issue: On certain vehicles, a software problem could cause the turn signal telltale to flash at the same speed as when a rear turn signal bulb fails. As a result, you may not notice when a rear turn signal bulb is not working. Canadian regulations require a change in the turn signal flash rate when a bulb fails. Safety Risk: A turn signal telltale that doesn't work properly could cause you to be unaware when a turn signal bulb fails. Turn signals that don't work may cause a person not to recognize when a driver intends to turn or change lanes. This could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the exterior lighting control module software. Alternatively, you may schedule an appointment to have the update performed at a GM dealership.

Fuel system

2025429 21 Aug 2025

Issue: On certain vehicles, fuel could spill in the fuel filler pocket when refueling. As a result, fuel could leak onto the left-side radiator and fan assembly. If this happens, the fuel could contact hot surfaces in the engine compartment. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to install a shield to divert spilled fuel.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
