3 recalls listed by Transport Canada for this model year

Steering 2025144 20 Mar 2025

Issue: On certain vehicles, a problem with the power steering system could cause it to turn off while driving. The power steering assist may return when the vehicle is restarted. Note: This is an expansion of recall N182182760 (Transport Canada recall no. 2019-056). Safety Risk: A loss of power steering assist would result in a sudden increase in steering effort, especially at low vehicle speeds. This could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to replace the power steering gear assembly.

Steering 2019056 8 Feb 2019

Issue: A problem with the power steering system could cause it to turn off while driving. The power steering assist may return when the vehicle is restarted. Safety Risk: A loss of power steering assist would result in a sudden increase in steering effort, especially at low vehicle speeds. This could increase the risk of a crash. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to have the power steering gear assembly replaced.

Airbag 2016439 9 Sep 2016

On certain vehicles, the sensing and diagnostic module (SDM), which controls airbag and pretensioner deployment, contains a software defect which may prevent the deployment of frontal airbags and pretensioners in certain circumstances. Failure of frontal airbags and seatbelt pretensioners to deploy in a crash (when warranted) could increase the risk of injury. Correction: Dealers will reflash the SDM with new software. In vehicles with any previous deployment events recorded in the SDM, the dealers will replace the existing SDM with a new SDM containing the latest software. Note: This recall affects 2014-2017 model year Sierra LD/Silverado LD models and 2015-2016 model year Sierra HD/Silverado HD model vehicles.
