Body	Sedan	Plant	Lansing - Grand River, Michigan, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/cadillac/cts/2015

6 recalls listed by Transport Canada for this model year

Airbag	2026246	21 May 2026
Issue: On certain vehicles, the driver-front airbag inflator could rupture when the airbag deploys in a crash. If this happens, the airbag may not properly inflate and metal fragments could be propelled toward vehicle occupants. Safety Risk: An airbag inflator that ruptures can create a risk of injury or death. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to replace the driver-front airbag module.		
Steering	2020291	25 Jun 2020
Issue: On certain vehicles, the bolts that attach the electric power steering assist motor to the steering gear may corrode and break. This could cause a loss of power steering assist. Safety Risk: A loss of power steering assist may result in a sudden increase in steering effort, especially at low vehicle speeds. This could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealer to replace the bolts that attach the electric power steering motor and apply a protective wax coating. If the bolts cannot be removed due to corrosion, the steering gear will be replaced.		
Powertrain	2020020	23 Jan 2020
Issue: On certain vehicles, the roll pins in the rear axle differential could fatigue and break over time. This could cause the rear wheels to lock up. Safety Risk: If this occurs while the vehicle is being driven, it could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the rear axle differential. It will be repaired or replaced as necessary.		

Electrical

2018481 7 Sep 2018

On certain vehicles equipped with heated front seats, the seat heating element may become damaged, causing localized over-heating. In a situation where the vehicle is started remotely and the heated seats are turned on, the seat could over-heat and melt, creating an increased risk of a fire causing injury and/or damage to property. Correction: Dealers will reprogram the body control module to deactivate the heated seat function when the vehicle is started remotely.

Steering

2018463 30 Aug 2018

On certain vehicles originally sold or currently registered in areas of heavy road salt usage during winter months (Ontario, Quebec, New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland & Labrador), the bolts that attach the electric power steering assist motor to the steering gear housing may corrode and break. This could cause a loss of power steering assist. The resulting increase in steering effort could create the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the mounting bolts and apply a corrosion protection coating to the gear housing and bolts. If the bolts bolt cannot be removed, a replacement steering gear will be installed.

Brakes

2015245 3 Jun 2015

On certain vehicles, the bracket between the brake pedal assembly and the rod that actuates the vehicle service brakes may fracture. If this occurs, the vehicle service brakes will not function, which could increase the risk of a crash causing injury and/or damage to property. Note: The parking brake would continue to function properly. Correction: Dealers will inspect the bracket and brake pedal, and replace if necessary.

Listed for the model year, not checked against your VIN. Cadillac confirms which apply.

Check your VIN with Cadillac Canada or call a Cadillac dealer with your VIN.

§5 DOCUMENTS

Window sticker This VIN reads as model year 1985 or 2015, before our coverage for this manufacturer.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 2 live listings, as of 26 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 26 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
