2 recalls listed by Transport Canada for this model year

Airbag 2023277 10 May 2023

Issue: On certain vehicles, the driver-front airbag inflator could rupture when the airbag deploys in a crash. If this happens, the airbag may not properly inflate and fragments could be propelled toward vehicle occupants. Safety Risk: An airbag inflator that ruptures can create a risk of injury or death. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to replace the driver-front airbag module.

Fabrics 2021146 12 Mar 2021

Issue: Under certain testing conditions, the front seat material may not meet the flammability requirements of Canadian regulations. However, when the seat mat is tested in a fully assembled state, with all four layers, it meets all requirements. Safety Risk: This is a testing issue that does not affect vehicle safety. Corrective Actions: This is not a recall. The company has made changes to ensure that all new vehicles have fully compliant seat-vent mats.

Listed for the model year, not checked against your VIN. GMC confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
