Body	Sport Utility Vehicle	Plant	Springhill, Tennessee, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/gmc/acadia/2020

5 recalls listed by Transport Canada for this model year

Visual system

2022536 22 Sep 2022

Issue: On certain vehicles, the connectors on the cables for the rearview camera may not be attached properly. As a result, the rearview camera image may not display when the transmission is shifted into reverse gear. Note: This recall only affects vehicles equipped with the optional Surround Vision feature. Safety Risk: A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealership to replace the coaxial cables for the rearview camera.

Tires

2021103 26 Feb 2021

Issue: Certain vehicles were built with tires that may have been cured too long. As a result, the sidewall could crack or the tread and belts could separate. This could lead to a sudden loss of air pressure and could cause a tire failure. Note: This recall only affects certain Continental tires, with specific date codes and mold numbers. Safety Risk: A tire failure could cause a loss of control and increase the risk of a crash. Corrective Actions: General Motors will notify the owners by mail and instruct them to take the vehicle to a dealer to inspect and replace the tires, if necessary.

Tires

2020530 6 Nov 2020

Issue: Certain vehicles were built with tires that may have been cured too long. As a result, the sidewall could crack or the tread and belts could separate. This could lead to a sudden loss of air pressure and could cause a tire failure. Note: This recall only affects vehicles equipped with certain Continental tires, with specific date codes and mold numbers. Safety Risk: A tire failure could cause a loss of control and increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the tires and replace the ones that have the DOT number and production mold number combinations identified by Continental.

Fuel system

2020484 15 Oct 2020

Issue: On certain vehicles, there could be a problem with the fuel pump assembly. As a result, the flow of fuel to the engine could be partially blocked. Under certain conditions, like a low fuel level, this could cause the engine to stall. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealer to replace the fuel pump module.

Airbag

2020350 30 Jul 2020

Issue: On certain vehicles, there may be a problem with the side curtain airbag inflators. As a result, the airbags may not inflate properly in a crash. Safety Risk: An airbag that does inflate properly could create an increased risk of injury in a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealer to replace the side curtain airbags.

Listed for the model year, not checked against your VIN. GMC confirms which apply.

SOURCES

- | | |
|---|---|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 15 live listings, as of 29 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 29 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
