Issue: Under certain testing conditions, the front seat material may not meet the flammability requirements of Canadian regulations. However, when the seat mat is tested in a fully assembled state, with all four layers, it meets all requirements. Safety Risk: This is a testing issue that does not affect vehicle safety. Corrective Actions: This is not a recall. The company has made changes to ensure that all new vehicles have fully compliant seat-vent mats.

Fuel system

2018289 1 Jun 2018

On certain vehicles, a joint on the high-pressure fuel pump may have been improperly welded during the manufacturing process. Over time, this could cause the weld to crack and create a potential fuel leak. A fuel leak in the presence of an ignition source could increase the risk of fire, causing injury and/or damage to property. Correction: Dealers will replace the high-pressure fuel pump and high-pressure fuel pipe.
