1 recall listed by Transport Canada for this model year

Structure 2021636 18 Oct 2021

Issue: On a small number of vehicles converted for wheelchair access by BraunAbility, a screw that supports the left-front wheel well liner may contact and damage the transmission case. If this happens, transmission fluid could leak and eventually cause a loss of power to the wheels.

Safety Risk: A transmission fluid leak onto a hot surface can create the risk of a fire. Additionally, a loss of power to the wheels could increase the risk of a crash. Corrective Actions: BraunAbility will notify owners by mail and instruct you to take your vehicle to a dealer to replace the affected screw and clip with a nylon rivet. The dealer will also inspect the transmission case for fluid leaks and repair it, as necessary.

Listed for the model year, not checked against your VIN. Chevrolet confirms which apply.
