1 recall listed by Transport Canada for this model year

Powertrain

2023142 16 Mar 2023

Issue: On certain vehicles, a problem inside the transmission could cause the left-front axle shaft to separate from the transmission. If this happens, there would be a loss of power to the wheels. This could also cause the vehicle to roll away while parked, if the parking brake isn't used.

Note: This problem could cause a grinding or clicking noise from the front of the vehicle. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Additionally, a parked vehicle that moves unintentionally could create a risk of a crash or an injury. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealership to replace the transmission sun gear.

Listed for the model year, not checked against your VIN. Chevrolet confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
