Tires 2015033 27 Jan 2015

Certain vehicles may be equipped with tires that may not comply with Canadian Motor Vehicle Tire Safety Regulations. During the inspection phase of routine tire compliance testing, cracks were observed in the tire's tread. This is contrary to the requirements of the standard. This could result in tire noise, ride vibration and/or tread chunking. Tires operated in this condition could be at greater risk of failure, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace affected tires.
