2 recalls listed by Transport Canada for this model year

Airbag 2016102 2 Mar 2016

On certain vehicles, the second stage of the driver frontal airbag may not deploy properly in certain high speed crashes. If the vehicle were to be involved in a high speed crash that triggers the second-stage deployment of the driver frontal airbag, the second stage of the inflator may not fill the airbag as completely and as quickly as designed, which could increase the risk of injury to the driver. Correction: Dealers will replace the driver frontal airbag module.

Accessories 2015575 30 Nov 2015

Certain vehicles may not comply with the requirements of Canada Motor Vehicle Safety Standard 201 - Occupant Protection. The console-compartment latch assembly may be unable to retain the door in the event of a crash, contrary to the requirements of the standard, increasing the risk of injury to the occupant. Correction: Dealers will replace the console-compartment latch assembly.
