4 recalls listed by Transport Canada for this model year

Airbag	2026414	27 Aug 2026
Issue: On certain vehicles, the airbag status indicator for the passenger airbag may not meet certain requirements of Canadian regulations. Safety Risk: This small error does not affect safety. Corrective Actions: This is not a recall. General Motors has made changes to ensure that all new vehicles meet Canadian regulations.		
Airbag	2025680	11 Dec 2025
Issue: Under certain conditions, a software problem could cause the passenger-front airbag to deploy with too much force. Note: This recall only affects certain vehicles equipped with the AT4X AEV (American Expedition Vehicle) option. Safety Risk: An airbag that inflates with too much force could create an increased risk of injury in a crash. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to update the airbag sensing and diagnostic module (SDM) software.		
Lights and instruments	2024518	12 Sep 2024
Issue: Under certain conditions, a software problem could cause the headlamps to flicker. Safety Risk: Headlamps that flicker could cause reduced visibility and could create a distraction for oncoming drivers. Both issues could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to replace a module in the headlamp that includes the correct software.		
Fuel system	2024375	28 Jun 2024
Issue: On certain vehicles, the lock ring that secures the fuel pump to the fuel tank may not have been locked properly. As a result, the lock ring could loosen and create a fuel leak. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, lock the fuel tank lock ring.
