Trim	Not in the decode	Maker	GENERAL MOTORS LLC
Body	Cargo Van	Plant	Wentzville, Missouri, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/gmc/savana/2019

4 recalls listed by Transport Canada for this model year

Brakes

2024543 19 Sep 2024

Issue: On certain vehicles, the brake lines could become damaged by contact with the body mounts. This could lead to a brake fluid leak and cause reduced braking. Note: This recall only affects certain cutaway chassis vehicles. Safety Risk: Reduced braking can cause extended stopping distances and increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the brake lines.

Electrical

2023210 6 Apr 2023

Issue: On certain vehicles, an unused wiring harness for a rear HVAC blower motor, located in the left B-pillar area, could become damaged if exposed to moisture or contaminants. If this happens, the wires could short circuit. Note: This recall only affects cutaway chassis incomplete vehicles. Safety Risk: A short circuit can create the risk of a fire. Corrective Actions: General Motors will notify owners by mail and instruct you to bring your vehicle to a dealership to seal the wiring for the rear HVAC blower motor at the left B-pillar.

Tires

2021103 26 Feb 2021

Issue: Certain vehicles were built with tires that may have been cured too long. As a result, the sidewall could crack or the tread and belts could separate. This could lead to a sudden loss of air pressure and could cause a tire failure. Note: This recall only affects certain Continental tires, with specific date codes and mold numbers. Safety Risk: A tire failure could cause a loss of control and increase the risk of a crash. Corrective Actions: General Motors will notify the owners by mail and instruct them to take the vehicle to a dealer to inspect and replace the tires, if necessary.

Lights and instruments

2019450 6 Sep 2019

Issue: On certain vans, the seat belt and airbag warning lights will not turn on for approximately 5 seconds after the ignition is switched to the ON or start position. Canadian regulations require these lights to turn on to demonstrate that the airbag system is working properly (bulb check) and to remind a driver to fasten their seat belt. Safety Risk: Warning lights that do not turn on during the start-up check could confuse a driver. In addition, the driver would not see a reminder to fasten their seat belt. This could create an increased risk of injury in a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to reprogram the instrument panel cluster.

Listed for the model year, not checked against your VIN. GMC confirms which apply.

Check your VIN with GMC Canada or call a GMC dealer with your VIN.

§5 DOCUMENTS

Window sticker This VIN reads as model year 1989 or 2019, before our coverage for this manufacturer.

SOURCES

- | | |
|---|---|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 15 live listings, as of 29 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 29 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
