## §2 OBLIGATIONS [2]

[cardog.app/tools/recalls/cadillac/xt5/2022](https://cardog.app/tools/recalls/cadillac/xt5/2022)

## 2 recalls listed by Transport Canada for this model year

### Fuel system 2022331 23 Jun 2022

Issue: On certain vehicles, the rollover valve in the fuel tank may not seal properly. As a result, fuel could leak from the tank in a rollover crash. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealership to inspect the fuel tank. If the rollover valve is dislodged or missing, the dealer will replace the fuel tank shell.

### Suspension 2022319 16 Jun 2022

Issue: On certain vehicles, a bolt for the left-rear suspension toe link may not have been properly tightened. As a result, the toe link could become loose or separate. This can cause a misalignment of the left-rear wheel and result in reduced vehicle stability. Safety Risk: Reduced vehicle stability could cause a loss of control and increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealership to inspect the left-rear suspension. If the bolt for the rear toe link is loose or missing, a technician will replace it.

Listed for the model year, not checked against your VIN. Cadillac confirms which apply.

Check your VIN with Cadillac Canada or call a Cadillac dealer with your VIN.

**STATEMENT OF SCOPE**

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
