1 recall listed by Transport Canada for this model year

Visual system

2022536 22 Sep 2022

Issue: On certain vehicles, the connectors on the cables for the rearview camera may not be attached properly. As a result, the rearview camera image may not display when the transmission is shifted into reverse gear. Note: This recall only affects vehicles equipped with the optional Surround Vision feature. Safety Risk: A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealership to replace the coaxial cables for the rearview camera.

Listed for the model year, not checked against your VIN. Cadillac confirms which apply.
