Airbag

2018523 27 Sep 2018

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the passenger frontal airbag inflator.

Airbag

2012031 31 Jan 2012

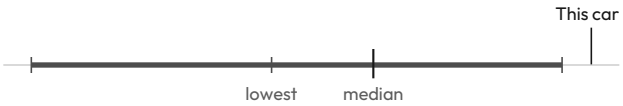

On certain vehicles, the side curtain airbag inflators may have been incorrectly manufactured and, as a result, one or both airbags may not deploy as intended. Failure of a side curtain airbag to deploy during a crash (where deployment is warranted), could increase the risk of personal injury to the seat occupant. Correction: Dealers will inspect and, if necessary, replace one or both side curtain airbag assemblies.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
