4 recalls listed by Transport Canada for this model year

Accessories 2017663 22 Dec 2017

On certain vehicles equipped with the Roadside Emergency Kit containing a Kidde fire extinguishers with black plastic handles and valves, the fire extinguishers may become clogged or require excessive force to activate. Also, the nozzle may detach from the valve assembly with enough force that it could cause injury, and fail to discharge. In case of fire, failure of the extinguisher to function could result in injury and/or property damage. Correction: Dealers will replace the suspect Kidde fire extinguisher with a new Kidde fire extinguisher with a steel nozzle. For more information about recalled fire extinguishers, please visit <https://inmarmarketaction.com/kidde/Kidde284CA/> or www.kidde.com.

Airbag 2016448 14 Sep 2016

On certain vehicles in certain types of crashes, airbag and seatbelt pretensioner deployment capability may be lost due to a short in the front impact sensor wiring affecting Occupant Restraint Controller function. Failure of airbags and seatbelt pretensioners to deploy in a crash (when warranted) could increase the risk of injury. Correction: Dealers will replace the Occupant Restraint Controller module.

Airbag 2013195 7 Jun 2013

On certain vehicles, due to a software error in the occupant restraint control (ORC) module, side curtain airbag and seatbelt pretensioner deployment could be delayed or not occur in slower-developing rollover events. This could increase the risk of personal injury in a crash. Correction: Dealers will reprogram the module.

Steering 2011224 10 Jun 2011

Certain vehicles may have been built with a missing or incorrectly installed steering column pivot rivet. A steering column with a miss-installed rivet may not perform as intended in the event of a crash, which may increase the risk of personal injury. Correction: Dealers will inspect for steering column rivet presence and alignment, and repair as required.
