2 recalls listed by Transport Canada for this model year

Airbag

2013231 4 Jul 2013

On certain vehicles, the airbag warning lamp may illuminate due to an electrical fault within the Occupant Restraint Control (ORC) module. As a result, the Active Head Restraints (AHR) may not deploy during a rear impact collision (where deployment is warranted), which could increase the risk of personal injury to the front seat occupants. Correction: Dealers will reprogram the Totally Integrated Power Module (TIPM) or replace the ORC module, as required.

Steering

2011224 10 Jun 2011

Certain vehicles may have been built with a missing or incorrectly installed steering column pivot rivet. A steering column with a miss-installed rivet may not perform as intended in the event of a crash, which may increase the risk of personal injury. Correction: Dealers will inspect for steering column rivet presence and alignment, and repair as required.
