§2 OBLIGATIONS ^[2]

cardog.app/tools/recalls/nissan/altima/2007

2 recalls listed by Transport Canada for this model year

Other 2008363 6 Oct 2008

On certain vehicles, a varistor in the Occupant Classification System (OCS) control unit located in the passenger seat cushion may have been manufactured incorrectly. Under certain conditions, this could cause an interruption of signal between the OCS and the Airbag control unit (ACU). This could result in the passenger airbag being suppressed. The (red) supplemental airbag warning light would flash & the (amber) front passenger airbag status light would illuminate to alert the vehicle operator, however in case of a crash a suppressed airbag could result in personal injury or death. Correction: Dealers will test the signal between the OCS & ACU and if necessary will replace the seat cushion containing OCS hardware.

Engine 2007203 19 Jun 2007

On certain vehicles, if a sufficiently hot object (i.e. cigarette ash) enters the air filter housing through the engine fresh air intake system, the air filter may ignite. This could result in an underhood fire causing property damage and/or personal injury. Correction: Dealers will replace the air filter with a revised version possessing improved anti-flammability characteristics. In addition, an air deflector will be installed in front of the air intake opening to reduce the intake of debris.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

Check your VIN with Nissan Canada or call a Nissan dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
