2 recalls listed by Transport Canada for this model year

Structure

2020242 29 May 2020

Issue: Over time, corrosion could cause the secondary hood latch to stick in the open position after it is used. If this happens, and the primary hood latch is released, the hood may open suddenly while driving. Safety Risk: A hood that opens suddenly while driving could block the driver's view and increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and provide an update to the owner's manual instruction for how to properly maintain the hood latch. Nissan will instruct you to take your vehicle to a dealer to replace the hood release lever spring. The dealer will also install a hood latch maintenance warning label.

Visual system

2019459 13 Sep 2019

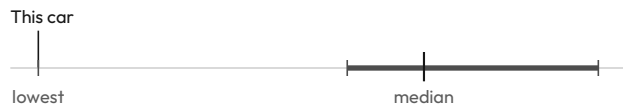

Issue: On certain vehicles, the rear view camera system does not return to the default setting when the transmission is shifted to reverse. This could cause a reduction in rear visibility if a driver had previously adjusted the camera display. Canadian regulations require that the rear view image returns to its original setting each time the camera is turned on. Safety Risk: Reduced rear visibility could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to update the software for the rear view camera.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
