Electrical

2005341 3 Nov 2005

On certain vehicles equipped with a driver seat power lumbar support, if the wire harness from the lumbar switch is routed incorrectly, the harness could be pinched or chafed against the structural parts on the underside of the seat when the seat is in the full-down position. An electrical short could ignite the harness cover and cause a fire. Correction: Dealers will replace the lumbar wire harness.

Other

On certain vehicles, the glass for the Skyview Roof may not have been quenched properly after the forming process resulting in temper imbalance. This could create extensive internal stress in the glass and eventually cause the glass to shatter. Correction: Dealers will replace the Skyview Roof glass.
