2 recalls listed by Transport Canada for this model year

Airbag

2023053 10 Feb 2023

Issue: On certain vehicles, the plastic emblem on the steering wheel airbag cover could detach and become a projectile when the airbag inflates in a crash. Note: This recall is for certain vehicles that had the steering wheel airbag replaced. Safety Risk: Projectiles in the occupant compartment could increase the risk of an injury. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the steering wheel airbag cover.

Fuel system

2010060 2 Mar 2010

On certain vehicles, the material used on fuel level sending unit contacts can wear and contaminate the sender. This causes the instrument panel fuel gauge to display that the vehicle still has some fuel left in the tank when the fuel tank is empty. An inaccurate fuel gauge can lead to engine stalling while driving, which may increase the risk of a crash causing property damage, personal injury or death. Correction: Letters will be sent to owners in two stages. The first letter will advise owners of fuel gauge inaccuracy and recommend maintaining a fuel level above the one half position. The second letter will follow, requesting owners bring their vehicles to a dealer for replacement of the fuel sender unit.
