§2 OBLIGATIONS [2]

cardog.app/tools/recalls/nissan/titan/2020

4 recalls listed by Transport Canada for this model year

Powertrain 2022502 8 Sep 2022

Issue: On certain trucks, the transmission parking pawl may not engage when you shift to park. If this happens, the truck could roll away, if the parking brake isn't used. Safety Risk: A parked vehicle that moves unexpectedly could create the risk of an injury or a crash. Corrective Actions: Nissan will notify owners by mail. The corrective actions for this recall are under development. To reduce the safety risk, Nissan recommends that you should always use the parking brake when you park.

Powertrain 2022341 27 Jun 2022

Issue: On certain trucks, the transmission parking pawl may not engage when you shift to park. If this happens, the truck could roll away, if the parking brake isn't used. Safety Risk: A parked vehicle that moves suddenly could create the risk of an injury or a crash. Corrective Actions: Nissan will notify owners by mail. The corrective actions for this recall are under development. To reduce the safety risk, Nissan recommends that you should always use the parking brake when you park.

Tires 2021140 12 Mar 2021

Issue: Certain vehicles were built with tires that may have been cured too long. As a result, the sidewall could crack or the tread and belts could separate. This could lead to a sudden loss of air pressure and could cause a tire failure. Note: This recall only affects certain Continental tires, with specific date codes and mold numbers. Safety Risk: A tire failure could cause a loss of control and increase the risk of a crash. Corrective Actions: Nissan will notify the owners by mail and instruct them to take the vehicle to a dealer to inspect and replace the tires, if necessary.

Electrical

2020603 9 Dec 2020

Issue: On certain trucks equipped with a gasoline engine, the engine wiring harness (EGI) may not have been assembled correctly. As a result, an exposed wire could cause a short circuit. If this happens, the engine could stall and/or there could be electrical arcing. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Electrical arcing could damage surrounding material and increase the risk of a fire. Corrective Actions: Nissan will notify owners by mail and instruct you to take your truck to a dealer to inspect the EGI harness and replace it with a new one if it is damaged. If no damage is found, the harness will be reassembled correctly.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

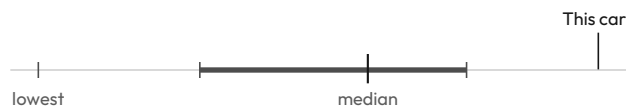

Check your VIN with Nissan Canada or call a Nissan dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 5 live listings, as of 29 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 29 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
