3 recalls listed by Transport Canada for this model year

Airbag 2023053 10 Feb 2023

Issue: On certain vehicles, the plastic emblem on the steering wheel airbag cover could detach and become a projectile when the airbag inflates in a crash. Note: This recall is for certain vehicles that had the steering wheel airbag replaced. Safety Risk: Projectiles in the occupant compartment could increase the risk of an injury. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the steering wheel airbag cover.

Electrical 2014039 12 Feb 2014

On certain vehicles, a circuit breaker was installed incorrectly during vehicle assembly, and could cause damage to the wiring harness, potentially disabling power seat and sunroof functions, discharging the battery and/or causing a short. A short circuit may cause an overheat condition which could result in property damage and/or personal injury. Correction: Dealers will inspect and affect repairs as necessary.

Steering 2012310 19 Sep 2012

On certain 2wd vehicles, the front hubs may have been manufactured incorrectly and could crack. This could allow the wheel to wobble, causing a noticeable vibration and, as a result, the driver may experience difficulty controlling the direction of the vehicle. Ultimately, the hub may break, allowing the wheel to separate from the vehicle. The errant wheel assembly could strike a vehicle, a stationary object, or a bystander. These issues could result in property damage and/or personal injury. Correction: Dealers will replace both front wheel hub assemblies.
