Lights and instruments

2025407 7 Aug 2025

Issue: Under certain conditions, a software problem could cause the daytime running lamps (DRLs) to briefly dim during idle stop-start. As a result, the lamps may not meet the requirements of Canadian regulations. Safety Risk: Daytime running lamps that dim could create a distraction and cause confusion for others. This could increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to update the engine control module software.

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to update the centre information display software.
