2 recalls listed by Transport Canada for this model year

Tires

2023235 18 Apr 2023

Issue: On certain trucks, the bead area of the tires may have been damaged when they were mounted onto the rims. Over time, this damage could create an air leak that can lead to a tire failure. Note: This problem may also affect the spare tire on certain trucks. Safety Risk: A tire failure could cause a loss of control and increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealership to inspect and replace the affected tires.

Powertrain

2022502 8 Sep 2022

Issue: On certain trucks, the transmission parking pawl may not engage when you shift to park. If this happens, the truck could roll away, if the parking brake isn't used. Safety Risk: A parked vehicle that moves unexpectedly could create the risk of an injury or a crash. Corrective Actions: Nissan will notify owners by mail. The corrective actions for this recall are under development. To reduce the safety risk, Nissan recommends that you should always use the parking brake when you park.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
