2 recalls listed by Transport Canada for this model year

Visual system

2026357 22 Jul 2026

Issue: Under certain conditions, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Volkswagen will notify owners by mail and advise you to take your vehicle to a dealership to update the rearview camera software.

Wheels

2025668 3 Dec 2025

Issue: On a small number of vehicles, the wrong wheel bolts may have been installed. As a result, the wheel bolt(s) can loosen and cause the wheel(s) to detach. Safety Risk: A wheel separation could cause a loss of control and increase the risk of a crash. Additionally, a wheel that separates could create a road hazard for others. Corrective Actions: To reduce the safety risk, Volkswagen advises you not to drive the vehicle until the recall repairs have been completed. None of the affected vehicles have been delivered to customers. Volkswagen will instruct dealers to inspect and, if necessary, replace the incorrect wheel bolt(s) before the vehicles are delivered.

Listed for the model year, not checked against your VIN. Volkswagen confirms which apply.
