§1 IDENTITY [1]

Model year	2011	Engine	3.6 L, 6 cylinders
Make	Dodge	Fuel	Gasoline
Model	Charger	Drive	RWD
Trim	SE	Maker	FCA CANADA INC.
Body	Sedan	Plant	Brampton, Ontario, Canada

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/dodge/charger/2011

11 recalls listed by Transport Canada for this model year

Electrical 2017341 10 Jul 2017

On certain vehicles equipped with electro-hydraulic power steering ("EHPS"), the alternator may fail suddenly. This could result in the engine stalling, causing a loss of motive power which could increase the risk of a crash as well as disable various vehicle safety systems, and could also cause a fire. Both issues could increase the risk of injury and/or damage to property. Correction: Dealers will inspect the part number on the alternator, and will replace the alternator as necessary. Note: Only specific engine and alternator combinations are affected by this campaign.

Electrical 2016500 12 Oct 2016

On certain vehicles equipped with a 220 amp alternator, frequent load cycling at the rated amperage capacity and particularly in hot ambient conditions could cause the alternator to develop a short, increasing the risk of an engine compartment fire. If a short develops in the alternator while the vehicle is being driven, it could also result in the engine stalling, causing a loss of motive power and increasing the risk of a crash. Both situations could increase the risk of injury and/or damage to property. Correction: Dealers will replace the alternator.

Airbag 2016265 27 May 2016

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the airbag inflator. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace airbag inflators before their function would be affected.

Accessories

2016039 27 Jan 2016

Certain vehicles equipped with an original equipment spare tire, the body-side sill assemblies may deform during tire jack use if wheel chocks are not used as instructed in the Owner's Manual. This could cause the vehicle to become unstable and cause the jack to fail, which could result in injury to the operator. Correction: Dealers will provide wheel chocks to vehicle owners. The wheel chocks will be installed with the vehicle's spare tire in such a manner that they must be removed before the spare tire is removed from its stowed location.

Airbag

2015329 22 Jul 2015

On certain vehicles, the software in Occupant Restraint Control (ORC) module may contain side impact calibrations that are overly sensitive. This could result in unintended deployment of the Side Airbag Inflatable Curtain (SABIC), seat airbag, and/or seatbelt pre-tensioner during certain driving conditions, which could startle the driver and result in a vehicle crash causing injury and/or property damage. Correction: Dealers will update the ORC module calibration.

Electrical

2014446 9 Oct 2014

On certain vehicles equipped with 3.6L engines and 160 amp output alternators, the alternator may fail suddenly. This could result in the engine stalling, causing a loss of motive power which could increase the risk of a crash as well as disable various vehicle safety systems, and could also cause a fire. Both issues could increase the risk of injury and/or damage to property. Correction: Dealers will replace the alternator.

§5 DOCUMENTS

Window sticker This VIN reads as model year 1981 or 2011, before our coverage for this manufacturer.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 3 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 28 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
