cardog.app/tools/recalls/chrysler/300/2017

2 recalls listed by Transport Canada for this model year

Engine 2018269 17 May 2018

On certain vehicles, an electronic fault may create a situation where the cruise control cannot be deactivated. If this occurs and the driver does not apply the brakes or shift the transmission to neutral, the vehicle could maintain speed or accelerate without warning, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the Powertrain Control Module (PCM) software and perform an update as necessary. Note: In the interim, owners are advised not to use the cruise control until the vehicle is repaired.

Powertrain 2017081 15 Feb 2017

On certain all-wheel drive vehicles, the front propshaft bolts may be loose. This could result in the front propshaft disconnecting from the vehicle, which would lead to loss of motive power while driving and could also damage powertrain and/or underbody components and create a road hazard, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace all eight front propshaft bolts.

Listed for the model year, not checked against your VIN. Chrysler confirms which apply.

Check your VIN with Mopar Canada or call a Chrysler dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
