Model year	2012	Engine	3.6 L, 6 cylinders
Make	Chrysler	Fuel	Flexible Fuel Vehicle (FFV)
Model	300	Drive	RWD
Trim	300C/Limited	Maker	FCA CANADA INC.
Body	Sedan	Plant	Brampton, Ontario, Canada

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/chrysler/300/2012

7 recalls listed by Transport Canada for this model year

Label	2024548 15 Aug 2024
Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.	
Electrical	2017341 10 Jul 2017
On certain vehicles equipped with electro-hydraulic power steering ("EHPS"), the alternator may fail suddenly. This could result in the engine stalling, causing a loss of motive power which could increase the risk of a crash as well as disable various vehicle safety systems, and could also cause a fire. Both issues could increase the risk of injury and/or damage to property. Correction: Dealers will inspect the part number on the alternator, and will replace the alternator as necessary. Note: Only specific engine and alternator combinations are affected by this campaign.	
Airbag	2016265 27 May 2016
On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the airbag inflator. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace airbag inflators before their function would be affected.	

Powertrain

2016184 26 Apr 2016

On certain vehicles, the gear shift position indicators and warnings may not be sufficient to deter drivers from exiting the vehicle when the transmission is inadvertently left in a gear other than "Park". If this occurs and the driver exits the vehicle with the engine running and the parking brake has not been set, unintended vehicle movement can result, increasing the risk of injury and/or a crash. Correction: Dealers will update vehicle software to include additional features to protect against driver error.

Electrical

2014446 9 Oct 2014

On certain vehicles equipped with 3.6L engines and 160 amp output alternators, the alternator may fail suddenly. This could result in the engine stalling, causing a loss of motive power which could increase the risk of a crash as well as disable various vehicle safety systems, and could also cause a fire. Both issues could increase the risk of injury and/or damage to property. Correction: Dealers will replace the alternator.

Airbag

2013101 5 Apr 2013

On certain vehicles, seat airbag wiring harnesses were built with improperly sized electrical terminal crimps that may cause an intermittent illumination of the airbag warning light. If the airbag light illuminates, the seat side airbags may not deploy in the event of a crash, which could increase the risk of injury. Correction: Dealers will replace driver and passenger seat airbag harnesses.

§5 DOCUMENTS

Window sticker This VIN reads as model year 1982 or 2012, before our coverage for this manufacturer.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 7 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 28 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
