4 recalls listed by Transport Canada for this model year

Airbag	2024168	14 Mar 2024
Issue: On certain vehicles, the side curtain airbag inflators could be defective. As a result, the driver and/or passenger side curtain airbag inflator(s) could rupture unexpectedly and metal fragments could be propelled toward vehicle occupants. Safety Risk: An airbag inflator that ruptures can create a risk of injury. Corrective Actions: FCA will notify owners by mail and advise you to take your vehicle to a dealership to replace both side curtain airbag modules.		
Powertrain	2018422	9 Aug 2018
Certain vehicles may have been built with a defective powertrain controller. If the powertrain controller fails while driving the engine may stall, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the powertrain controller.		
Engine	2018269	17 May 2018
On certain vehicles, an electronic fault may create a situation where the cruise control cannot be deactivated. If this occurs and the driver does not apply the brakes or shift the transmission to neutral, the vehicle could maintain speed or accelerate without warning, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the Powertrain Control Module (PCM) software and perform an update as necessary. Note: In the interim, owners are advised not to use the cruise control until the vehicle is repaired.		

Powertrain

2018223 1 May 2018

On certain vehicles equipped with an 8-speed transmission, an incorrect park lock rod may have been installed during the transmission assembly process. This could cause the transmission to lose the Park function, which could result in unintended vehicle movement, which would increase the risk of crash causing injury and/or damage to property. Correction: Dealers will replace the park lock rods.
