§2 OBLIGATIONS [2]

cardog.app/tools/recalls/chrysler/300/2013

6 recalls listed by Transport Canada for this model year

Label

2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Airbag

2018027 11 Jan 2018

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the passenger frontal airbag inflator. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace airbag inflators before their function would be affected.

Electrical

2017341 10 Jul 2017

On certain vehicles equipped with electro-hydraulic power steering ("EHPS"), the alternator may fail suddenly. This could result in the engine stalling, causing a loss of motive power which could increase the risk of a crash as well as disable various vehicle safety systems, and could also cause a fire. Both issues could increase the risk of injury and/or damage to property. Correction: Dealers will inspect the part number on the alternator, and will replace the alternator as necessary. Note: Only specific engine and alternator combinations are affected by this campaign.

Powertrain

2016184 26 Apr 2016

On certain vehicles, the gear shift position indicators and warnings may not be sufficient to deter drivers from exiting the vehicle when the transmission is inadvertently left in a gear other than "Park". If this occurs and the driver exits the vehicle with the engine running and the parking brake has not been set, unintended vehicle movement can result, increasing the risk of injury and/or a crash. Correction: Dealers will update vehicle software to include additional features to protect against driver error.

Electrical

2014446 9 Oct 2014

On certain vehicles equipped with 3.6L engines and 160 amp output alternators, the alternator may fail suddenly. This could result in the engine stalling, causing a loss of motive power which could increase the risk of a crash as well as disable various vehicle safety systems, and could also cause a fire. Both issues could increase the risk of injury and/or damage to property. Correction: Dealers will replace the alternator.

Powertrain

2013434 6 Dec 2013

On certain Dodge Charger, Chrysler 300 all-wheel drive vehicles and RAM 1500 four wheel drive vehicles equipped with 8 speed automatic transmissions, the transmission output shaft could fail. If this were to occur while the vehicle is being driven, it could result in a loss of motive power. If this were to occur while the vehicle is parked without the parking brake applied, it could result in unintended vehicle movement. Both situations could increase the risk of a crash causing injury and/or property damage. Correction: Dealers will replace the transmission in affected vehicles.

Listed for the model year, not checked against your VIN. Chrysler confirms which apply.

Check your VIN with Mopar Canada or call a Chrysler dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
