Body	Sedan	Plant	Brampton, Ontario, Canada

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/dodge/charger/2017

5 recalls listed by Transport Canada for this model year

Label	2024548	15 Aug 2024
Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.		
Engine	2018269	17 May 2018
On certain vehicles, an electronic fault may create a situation where the cruise control cannot be deactivated. If this occurs and the driver does not apply the brakes or shift the transmission to neutral, the vehicle could maintain speed or accelerate without warning, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the Powertrain Control Module (PCM) software and perform an update as necessary. Note: In the interim, owners are advised not to use the cruise control until the vehicle is repaired.		
Powertrain	2018219	1 May 2018
On certain all wheel drive vehicles, the front prop shaft universal joint could seize or fracture. This could allow for the prop shaft to completely disengage from the vehicle, which could create a road hazard and could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the front prop shaft.		

Engine

2017387 9 Aug 2017

On certain vehicles equipped with the Hellcat engine, the engine oil cooler line could separate at the crimp of the hose to the aluminum tube. This could lead to a rapid loss of engine oil which could spray on the windshield impairing visibility, cause engine seizure and/or, in the presence of an ignition source, increase the risk of fire. These conditions could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the engine oil cooler lines.

Powertrain

2017081 15 Feb 2017

On certain all-wheel drive vehicles, the front propshaft bolts may be loose. This could result in the front propshaft disconnecting from the vehicle, which would lead to loss of motive power while driving and could also damage powertrain and/or underbody components and create a road hazard, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace all eight front propshaft bolts.

Listed for the model year, not checked against your VIN. Dodge confirms which apply.

Check your VIN with Mopar Canada or call a Dodge dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
