9 recalls listed by Transport Canada for this model year

Label	2024548	15 Aug 2024
Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.		
Other	2019420	21 Aug 2019
Issue: This recall is for aftermarket replacement rear window glass produced by Vitro Automotriz. Certain rear window glass may not have been properly tempered. If the window breaks, the glass may separate into large pieces instead of very small ones. Note: This is a voluntary recall that is not being conducted under the requirements of the Motor Vehicle Safety Act. Safety Risk: Glass that breaks in to large pieces could create a risk of injury. Corrective Actions: The company will notify consumers by mail and instruct them to inspect the designation code marked on the rear window glass. Products affected by this recall have the designation "DOT 287" along with the lettering "VMR" (Replacement Market) and a date code that is before July 2019. This information is printed on the bottom corner of the glass. Consumers should contact Vitro's customer service at 1-412-995-6457 or argbacklites@vitro.com to arrange for replacement of the glass.		
Seats and restraints	2018439	21 Aug 2018
On certain wheelchair-accessible vehicles, the bolts used to attach the removable seats to the floor may contain a defect and could break in the event of a crash, creating a risk of injury. Correction: Dealers will replace the defective bolts.		

Fuel system

2016575 17 Nov 2016

On certain Amerivan 10 wheelchair accessible vehicles built on Dodge Grand Caravan and Chrysler Town and Country platforms, the crimp fasteners used to retain fittings in the fuel line may not be fully crimped or compressed. This could result in a fuel leak. Leaking fuel, in the presence of an ignition source, could lead to a fire causing injury and/or damage to property. Correction: Dealers will inspect fasteners and crimp the fasteners further to ensure they are fully compressed and seated.

Suspension

2015288 26 Jun 2015

On certain Amerivan 10 wheelchair accessible vehicles built on Dodge Grand Caravan and Chrysler Town and Country platforms, the upper rear mounts for the shock absorbers may separate from the chassis. This could affect vehicle handling, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will install a revised mounting bracket of a different design.

Electrical

2014167 8 May 2014

On certain vehicles, if the vent window switch (located in the driver's door armrest) is exposed to liquids, it could overheat. An overheated vent switch could result in a burning odour, smoke, or fire, increasing the risk of injury and/or property damage. Correction: Dealers will replace the switch with an updated design.
