6 recalls listed by Transport Canada for this model year

High voltage

2026272 4 Jun 2026

Issue: On certain vehicles, the high-voltage battery could fail. If this happens, the high-voltage battery could overheat. Note: This recall only affects plug-in hybrid (PHEV) models. Safety Risk: A high-voltage battery that fails can create a fire risk, even while the vehicle is parked and turned off. Corrective Actions: To reduce the safety risk, FCA Canada advises that you should not charge your vehicle and to park the vehicle outdoors and away from other vehicles or structures until the recall repairs have been completed. FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the high-voltage battery. The dealer will also install an advanced diagnostic software that will monitor the high-voltage battery and warn you if it detects a problem.

Seats and restraints

2026003 5 Jan 2026

Issue: On certain vehicles converted for wheelchair access by Vantage Mobility, the wheelchair tie-down retractors may not have been manufactured properly. As a result, the retractor(s) may not lock automatically. If this happens, the wheelchair may not be secured correctly and could move in a crash. Note: This recall only affects certain Q'Straint QRT-DELUXE and QRT-MAX wheelchair retractors with the part number Q8-6200 or Q8-6209. Safety Risk: A wheelchair that moves in a crash could increase the risk of injury. Corrective Actions: To reduce the safety risk, Vantage Mobility recommends you confirm the wheelchair is secured properly by attempting to move it before driving until the recall repairs have been completed. Vantage Mobility will notify owners by mail and advise you to take your vehicle to a Vantage Mobility service center to inspect and, if necessary, replace the wheelchair retractor(s).

Label

2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

High voltage

2024411 18 Jul 2024

Issue: On certain vehicles, a problem inside the high-voltage battery assembly could cause a short circuit. Note: This recall only affects plug-in hybrid (PHEV) models. Safety Risk: A short circuit can create the risk of a fire, even while the vehicle is parked and turned off. Corrective Actions: To reduce the safety risk, FCA advises not to charge your vehicle and to park it outdoors and away from other vehicles or structures until the recall repairs are completed. FCA Canada will notify owners by mail and advise you take your vehicle to a dealership to update the high-voltage battery pack control module (BPCM) software. The dealer will also inspect and, if necessary, replace the battery pack assembly.

Visual system

2024338 13 Jun 2024

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Note: For the Grand Cherokee model, this recall affects 2022–2023 Jeep Grand Cherokee and 2021–2023 Grand Cherokee L models. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to update the radio software.

Electrical

2023008 18 Jan 2023

Issue: On certain plug-in hybrid electric vehicles (PHEV), a wiring connector inside the transmission could short circuit. As a result, the engine could shut down and cause a sudden loss of power to the wheels. Safety Risk: A sudden loss of power to the wheels could increase the risk of a crash. Corrective Actions: FCA will notify owners by mail and instruct you to take your vehicle to a dealership to update the power inverter module (PIM) and, if necessary, update the instrument panel cluster software.

Listed for the model year, not checked against your VIN. Chrysler confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
