On certain vehicles, a defect may cause the transmission pump rotor to seize or break, resulting in a loss of transmission pressure. This could result in a loss of motive power which, in conjunction with traffic and road conditions, and the driver's reactions may increase the risk of a crash causing injury. Correction: dealers will replace the transmission pump assembly.

Brakes

2016130 23 Mar 2016

On certain vehicles, the left front brake caliper may have been cast from an incorrect material during manufacturing. This could cause the brake caliper to possibly crack under an extreme braking application. Correction: Dealers will inspect the front left caliper date code and replace the caliper if it is from the suspect casting date.
