2 recalls listed by Transport Canada for this model year

Airbag

2014383 9 Sep 2014

Certain vehicles may experience front passenger side curtain and/or seat airbag inadvertent deployments, due to a resonance at the rear quarter panel sensor that can be aggravated by aftermarket installed roof racks & associated ladders/equipment. Unintended airbag deployment, in a non-warranted (non-impact) situation, could startle the driver, which could result in a vehicle crash causing injury and/or property damage. Correction: Dealers will update the Occupant Restraint Control (ORC) module software.

Electrical

2014167 8 May 2014

On certain vehicles, if the vent window switch (located in the driver's door armrest) is exposed to liquids, it could overheat. An overheated vent switch could result in a burning odour, smoke, or fire, increasing the risk of injury and/or property damage. Correction: Dealers will replace the switch with an updated design.
