6 recalls listed by Transport Canada for this model year

Visual system — 2026093 — 3 Mar 2026

Issue: Under certain conditions, the infotainment system could overheat. As a result, the rearview camera image may not display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the accessory protocol image module (APIM) software.

Visual system — 2025260 — 9 May 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display or to freeze when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the SYNC software. Alternatively, you may schedule an appointment to have the update performed at a Ford dealership.

Visual system — 2025141 — 14 Mar 2025

Issue: On certain vehicles, the recall repairs completed by a Ford dealer during recall 22S14 (Transport Canada recall no. 2022-117) may not have been done correctly. As a result, a second repair is required. On certain vehicles, a software problem could cause the rearview camera to display a blank or distorted image. Safety Risk: A rearview camera image that does not display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the SYNC 4 module software.

Engine

2024492 23 Aug 2024

Issue: On certain vehicles, the intake valves may not have been manufactured properly. As a result, the valves could break and cause the engine to fail. Note: This recall only affects certain vehicles equipped with a 2.7L or 3.0L EcoBoost engine. This problem would cause the engine to run rough and the engine malfunction indicator lamp to turn on. Safety Risk: An engine failure could cause a sudden loss of power to the wheels and increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the engine.

Visual system

2022117 14 Mar 2022

Issue: On certain vehicles, a software problem could cause the rearview camera to display a blank or distorted image. Safety Risk: A rearview camera image that does not display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and send a wireless over-the-air software update to each vehicle. Alternatively, you may schedule an appointment to have the update performed at a Ford dealer.

Seats and restraints

2021308 24 May 2021

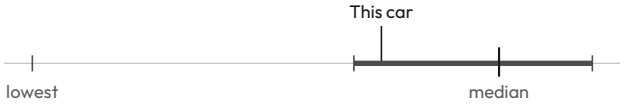

Issue: On a small number of vehicles, the driver's seat belt pretensioner may be missing components. As a result, the seat belt pretensioner may not work properly in a crash. Safety Risk: A seat belt pretensioner that does not work properly could create an increased risk of injury in a crash. Corrective Actions: Ford will notify owners by mail and instruct you to take your vehicle to a dealer to replace the driver's seat belt retractor and pretensioner assembly.

> Listed for the model year, not checked against your VIN. Ford confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same configuration, 37 live listings, as of 29 Nov 2026
[5] Live public dealer listings on Cardog, as of 29 Nov 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
