3 recalls listed by Transport Canada for this model year

Visual system	2025360	27 Jun 2025
Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Canadian regulations require the rearview image to display when the vehicle is reversing. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the SYNC software.		
Powertrain	2021011	18 Jan 2021
Issue: On certain vehicles, the rear drive unit was not properly filled with oil. As a result, the rear axle could seize. If this happens, the rear wheels could lock up and cause a loss of power to the wheels. Safety Risk: A rear-wheel lock up while driving could cause a loss of control that could result in a crash. Corrective Actions: Ford will notify owners by mail and instruct you to take your vehicle to a Ford or Lincoln dealer to check the oil level in the rear drive unit. If the drive unit is filled to the minimum oil level, it will be topped up to the full level. If the oil is below the minimum level, the drive unit will be replaced.		
Visual system	2020454	24 Sep 2020
Issue: On certain vehicles, an electrical problem with the rearview camera could cause it not to work properly. As a result, the rearview image may be distorted or not display at all. Safety Risk: A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and instruct you to take your vehicle to a dealer to replace the rearview camera.
